Professional Summary

Full-stack developer and founder of Soren Technology, a startup in progress focused on building modern websites and custom APIs for businesses and developers.

Experienced in creating scalable monorepo architectures, responsive web apps, and integrated billing/authentication systems using Next.js, React, TypeScript,

Node.js, and MongoDB. Skilled in deployment, domain management, and third-party integrations including Stripe, LemonSqueezy, and Google APIs. Passionate about clean UI/UX design and delivering practical, real-world solutions for clients.

Currently expanding backend expertise into PostgreSQL, microservices, and DevOps.
